

CURRICULUM VITAE

ANDERS LINDQUIST

E-mail: alq@math.kth.se **Internet:** <http://www.math.kth.se/~alq/>

EDUCATION

1967 MS (civiling) in Engineering Physics Royal Institute of Technology (KTH)
1968 TeknL in Optimization and Systems Theory Royal Institute of Technology (KTH)
1972 PhD in Optimization and Systems Theory Royal Institute of Technology (KTH)

POSITIONS

2011 – Zhiyuan Chair Professor, Shanghai Jiao Tong University, Shanghai, China
2006 –2016 Director, Center for Industrial and Applied Mathematics (CIAM), KTH
1982 –2009 Professor, Chair of Optimization and Systems Theory, KTH, Sweden
2000 – 2009 Head of the Department of Mathematics, KTH, Sweden
1989 –2009 Affiliate Professor, Washington University, St. Louis
1980 – 1984 Professor of Mathematics, University of Kentucky
1974 – 1980 Associate Professor, University of Kentucky
fall sem 1973 Associate Professor (Research), Brown University
1972 – 1973 Assistant Professor, University of Florida (postdoc with R.E. Kalman)
1967 – 1968 Researcher, Swedish Institute of National Defence

HONORS AND AWARDS

1996 Member of the Royal Swedish Academy of Engineering Sciences
1997 Foreign Member of Russian Academy of Natural Sciences
1994 Honorary Member of Hungarian Operational Research Society
1989 Fellow of IEEE (Institute of Electrical and Electronics Engineers)
2000 Zaborszky Lecturer for the year 2000 (www2.math.kth.se/~alq/ZaborszkySeries.pdf)
2001 SIGEST paper award
2002 Gordon McKay Visiting Professor University of California, Berkeley
2003 George S. Axelby Outstanding Paper Award of the IEEE Control Systems Society (CSS) for the year 2003
2005 Distinguished Israel Pollak Lecturer for the academic year 2005/2006
2009 W.T. and Idalia Reid Prize in Mathematics for 2009, awarded by the Society for Industrial and Applied Mathematics (SIAM)
2010 Fellow of SIAM (Society for Industrial and Applied Mathematics)
2010 Honorary Doctor (Doctor Scientiarum Honoris Causa) at Technion (Israel Institute of Technology), Haifa
2010 Fellow of IFAC (International Federation of Automatic Control)
2010 Life Fellow of IEEE (Institute of Electrical and Electronics Engineers)
2010 Borelius Medal from the Science School of the Royal Institute of Technology
2011 State specially recruited expert (“highest honor for experts recruited from overseas” to China)
2015 Foreign Member of the Chinese Academy of Sciences
2016 Shanghai Magnolia Award (awarded to expats for their contribution to the city’s development)
2016 Honorary Professor at China University of Petroleum, Qingdao.

OTHER APPOINTMENTS

- 2015 External Member of the Consultative Committee of Research Center of Excellence for Mathematical Sciences (RCEMS), Chinese Academy of Sciences
- 2014 Member of the International Evaluation Committee of the Department of Mathematics, Shanghai Jiao Tong University, July 2014
- 2014 Member of SJTU Mathematical Sciences Steering Committee, to oversee the future development of mathematical sciences on campus, 2014
- 2013– Member of the Prize Committee of the Chen Han-Fu Award of the Chinese Society of Automatic Control, 2013 –
- 2012 Member of Expert Diagnostic Assessment Committee for evaluating the Academy of Mathematics and Systems Science, Chinese Academy of Sciences, November 2012
- 2010 Selection Committee for the 2010 Axelby Outstanding Paper Award
- 2007 – 2010 Fellow Nominations Chair of the IEEE Control Systems Society
- 2009 – 2010 Prize Committee for the ICIAM Collatz Prize
- 2006–2011 IFAC Young Author Prize Selection Committee
- 2005 Control System Society evaluation committee for selection of IEEE Fellows
- 2005–2008 Prize Committee for the European Congress of Mathematics
- 2006– Committee on Applied Mathematics of the European Mathematical Society
- 2001–2003 Vice-chairman, Division VII of the Royal Swedish Academy of Engineering Sciences (IVA)
- 2004–2010 Member, Board of Governors, Israel Institute of Technology (Technion), Haifa
- 2004– Board Member, Foundation “Nordic Information Processing” (BIT)
- Spring 2003 Scientific leader at Institut Mittag-Leffler, Djursholm, Sweden. (Program on Mathematical Control and Systems Theory)
- 2002 – Team leader, European project “Real-time embedded control of mobile systems with distributed sensing” (RECSYS)
- 1996 – Member of Board, Strategic Center for Autonomous Systems, KTH
- 1997 – Advisory Board Member of the Institute for Mathematics of the Life Sciences, Texas Tech University
- 1993 – Team leader, European Research Network for System Identification

EDITORIAL BOARDS

- 2014 – *Proceedings of the Royal Society A* (Editorial Board)
- 2010 – *SIAM Review* (Editorial Board)
- 2012– *EMS Surveys in Mathematical Sciences* (Editorial Board)
- 2013 – 2013 *Chinese Journal of Mathematics* (Editorial Board)
- 2005 – 2012 *ACTA Automatica Sinica* (Editorial Board)
- 1989 – 1998 *J of Mathematical Systems, Estimation, and Control* (Communicating Ed)
- 1989 – 1993 *Systems and Control Letters* (Associate Ed)
- 1991 – 2000 *International Journal of Adaptive Control and Signal Processing*
- 1989 – 1993 *Progress in Systems and Control Theory*, Birkhäuser, Boston (Associate Ed)
- 1989 – *Systems and Control: Foundations and Applications* (Associate Ed)
- 1996 – *Applied and Computational Control, Signals, and Circuits* (Editorial Board)

VISITING POSITIONS

March 2004	Visiting Professor, University of Kyoto
October 2002	Gordon McKay Visiting Professor, UC Berkeley
March – June 1994	Visiting Professor, Technion, Haifa
March 1989	Distinguished Visiting Professor, Arizona State University
July – Aug 1989	Visiting Scientist, Inst of Applied Systems Analysis, Vienna, Austria
July – Aug 1988	Visiting Professor, Chinese Academy of Sciences, Shanghai, China
Oct – Nov 1985	Visiting Scientist, USSR Academy of Sciences, Moscow
1975 – 1992	Visiting Professor, University of Padova and CNR, Italy (several instances, a month at a time)
1975–1976	SIAM Visiting Lecturer

PATENTS

1999	United States Patent 5,940,791, “Method and Apparatus for Speech Analysis and Synthesis” (joint with C. I. Byrnes), August 17, 1999
2001	United States Patent 6,256,609, “Method and Apparatus for Speaker Recognition” (joint with C. I. Byrnes), July 3, 2001
2002	United States. Patent 6,400,310, “A Tunable High-Resolution Spectral Estimator” (joint with C. I. Byrnes and T. T. Georgiou), June 4, 2002
2007	United States Patent 7,233,898, “Method and Apparatus for Speaker Verification Using a Tunable High-Resolution Spectral Estimator” (joint with C. I. Byrnes and T. T. Georgiou), June 19, 2007

PLENARY LECTURES AND SELECTED INVITED ADDRESSES

2018	Keynote Speaker at the 2018 Chinese Control and Decision Conference (2018 CCDC), Shenyang, China, June 9-11, 2018.
2017	Invited speaker at the 2nd International Conference on Communication, Image and Signal Processing (CCISP 2017), Shenzhen, China, November 17-19, 2017.
2017	One-hour invited address at the 2017 International Conference of Innovation and Entrepreneurship, Jingjiang, China, September 22, 2017.
2017	Invited speaker at the Workshop on Herglotz-Nevanlinna functions and their applications, Institut Mittag-Leffler, Djursholm, Sweden, May 8-12, 2017.
2017	Colloquium speaker at the Institute of Systems Research, University of Maryland, USA, May 3, 2017.
2017	Keynote speaker at SJTU Future Information Technology International Forum for Young Scholars (2nd SIFYS-2017), Shanghai, April 13, 2017.
2017	Invited speaker at the 2017 International Symposium on Computational and Applied Mathematics, February 26-28, 2017, Sanya, China.
2016	Peter Sagirow Distinguished Lecture, University of Stuttgart, Germany, November 2, 2016.
2016	Kwan Chao-Chih Distinguished Lecture, Academy of Mathematics and System Science, Beijing, July 18, 2016.
2016	Keynote speaker at International Conference on Probability and Stochastic Analysis (ICPSA 2015), Shanghai, July 19-22, 2015.
2015	Invited speaker at the First IFAC Conference on Modeling, Identification and Control of Nonlinear Systems (MICNON 2015) dedicated to the memory of Vladimir Yakubovich (1926-2012), Saint Petersburg, Russia, June 24-26, 2015.

- 2015 Invited speaker at International Conference Optimization and Applications in Control and Data Science on the occasion of Boris Polyak's 80th birthday, Moscow, Russia, May 13-15, 2015.
- 2014 Invited plenary speaker at the Third International Conference on Power, Control, Signal Processing and Computations (EPSCICON), Thrissur, Kerala, India, January 8 - 10, 2014.
- 2012 Invited plenary speaker at 5th International Conf. on Optimization and Control with Applications, Beijing, China, 4-8 Dec. 2012.
- 2012 Invited plenary speaker at Pujiang Innovation Forum (Future Science Forum), Shanghai, China, 3-5 Nov. 2012.
- 2011 Invited plenary speaker at the 18th IFAC World Congress, Milano, Italy, August 28 - September 2, 2011.
- 2011 Invited plenary speaker at the 25th IFIP Conference on System Modeling and Optimization, Berlin, Germany, September 12 - 16, 2011.
- 2010 Invited speaker at the symposium on Systems, Control, and Signal Processing, Kyoto, Japan, March 29-31, 2010.
- 2009 Invited one-hour semi-plenary lecture at the combined 48th IEEE Conference on Decision and Control and 28th Chinese Control Conference, Shanghai, China, Dec. 16-18, 2009.
- 2009 Invited speaker in Colloquia Patavina, Univ. of Padova, Italy, Oct. 13, 2009.
- 2009 Reid Prize Lecture, 2009 SIAM Annual Meeting, Denver, Colorado, USA, July 6-10, 2009.
- 2009 Colloquium speaker at University of Würzburg, Germany, July 17, 2009.
- 2009 Invited speaker at the International Conference on Approximation Methods for Design and Control, Buenos Aires, Argentina, March 9-11, 2009.
- 2009 Invited speaker at the Oberwolfach Workshop in Control Theory, Mathematisches Forschungsinstitut Oberwolfach, Germany, February 22-28, 2009.
- 2009 Invited speaker at the Fourth International Conference on Control Sciences, Moscow, January 26 - 30, 2009.
- 2008 Invited speaker at the Workshop on Linear Systems Theory: Model Reduction, Sde Boker, Israel, September 15-19, 2008.
- 2007 Invited speaker at International Conference on Modeling, Estimation and Control, Venice, Italy, October 4-5, 2007.
- 2007 Invited plenary speaker at MathESTIA 2007, Biarritz, France, April 24-27, 2007.
- 2007 Invited speaker at International conference to mark the 100th anniversary of the birth of Mark Krein, Odessa, Ukraine, April 9 - 14, 2007.
- 2006 Invited speaker at Symposium in honor of Bill Gragg at the occasion of his 70th birthday, Naval Postgraduate School, Monterey, Calif., Nov. 3-4, 2006.
- 2006 Invited speaker at Symposium in honor of Michiel Hazewinkel at his retirement, CWI, Amsterdam, September 7, 2006.
- 2006 Invited plenary lecturer at the 25th Chinese Control Conference (CCC2006), Harbin, China, August 7-10, 2006.
- 2006 Invited plenary lecturer at the International Congress on the Applications of Mathematics (ICAM), Santiago de Chile, March 13-17, 2006.
- 2005 Invited speaker at the Second Sde Boker Workshop on Linear Systems, Israel, September 11-17, 2005.

- 2005 An invited series of lectures at the 27th Finnish Summer School on Probability Theory, Åbo Akademi University, Åbo/Turku, Finland, June 6–10, 2005.
- 2005 Invited speaker at the International Conference on Optimization and Control, dedicated to 70th birthday of Boris Polyak, Moscow, May 19–20, 2005.
- 2004 Invited speaker at the Workshop on Observation and Estimation, Center for Advanced Studies in Mathematics, Ben-Gurion University of the Negev, Israel, July 12–16, 2004.
- 2004 Semi-plenary invited presentation at the International Symposium on the Mathematical Theory of Networks and Systems (MTNS 2004), Leuven, Belgium, July 5–9, 2004.
- 2004 Invited speaker at the International Workshop on Dynamical Systems and Control, Technion, Haifa, June 20–22, 2004.
- 2003 Invited speaker at the Workshop on the Geometry in Nonlinear Control, Stephan Banach International Mathematical Center, June 16–21, 2003.
- 2002 Gordon McKay Lecture Series at UC Berkeley, October 11–17, 2002.
- 2002 Distinguished Lecturer in EECS Joint Colloquium, Berkeley, Oct. 16, 2002.
- 2002 Invited speaker at the Symposium on New Trends in Nonlinear Dynamics and Control, and their Applications, Naval Postgraduate School, Monterey, California, October 18–19, 2002.
- 2002 Invited speaker at the Satellite Conference of ICM 2002 on Optimization and Control, Xian, China, August 30–September 1, 2002.
- 2002 Invited speaker at the Stieltjes Analysis Colloquium, Thomas Stieltjes Institute for Mathematics, Amsterdam, the Netherlands, April 8, 2002.
- 2001 Invited lecturer at the minicourse *A short course on Nevanlinna-Pick interpolation theory*, Åbo Akademi University, November 26–29, 2001.
- 2001 Invited speaker at *Cybernetics in the 21st Century: Information and Complexity in Control Theory*, University of Tokyo, Japan, November 1–2, 2001.
- 2001 Plenary speaker at the *Fourth SIAM Conference on Linear Algebra in Signals, Systems and Control*, Boston, USA, August 13–16, 2001
- 2001 Plenary speaker at the *Fifth IFAC Symposium on Nonlinear Control Systems (NOLCOS 2001)*, Saint Petersburg, Russia, July 4–6, 2001.
- 2000 Plenary speaker at *Asian Control Conference (ASCC)*, Shanghai, China, July 4–7, 2000.
- 2000 Zaborzky Lecturer for the year 2000, Washington University, St. Louis, May 8, 9, and 10, 2000. A series of three lectures.
- 1999 Plenary speaker at the *Sixth St. Petersburg Symposium on Adaptive Systems Theory*, St. Petersburg, Russia, September 7–9, 1999.
- 1999 Invited speaker at *Recent Advances in Systems and Control*, Washington University, St. Louis, December 1, 1999.
- 1999 Invited speaker at *Advances in Systems Theory*, Cambridge, Massachusetts, October, 15–16, 1999
- 1998 Plenary speaker at *International Conference of Dynamical Systems: Stability, Control, Optimization*, Minsk, Belarus, September 28–October 4, 1998.
- 1997 Invited speaker at *Operators, Systems, and Linear Algebra: Three Decades of Algebraic Systems Theory*, Kaiserslautern, Germany, September 24–26, 1997.
- 1997 Plenary speaker at *International Conference on Control of Oscillations and Chaos*, St. Petersburg, Russia, August 27–29, 1997.
- 1997 Two-hour Tutorial Lecture at the *11th IFAC Symposium on System Identification*, Fukuoka, Japan, July 8–11, 1997.

- 1996 Plenary speaker at Conference on Stochastic Differential and Difference Equations, Győr, Hungary, August 21–24, 1996.
- 1996 Plenary speaker at the *12th International Symposium on the Mathematical Theory of Networks and Systems (MTNS96)*, St Louis, June 1996.
- 1995 Invited speaker at *Workshop on the dynamics and control of physical systems*, Cortona, Italy, May 22–25, 1995.
- 1995 Plenary speaker at Workshop on *Nonlinear and Game Theoretic Control Synthesis*, Euler Mathematical Institute, St. Petersburg, March 13–26, 1995.
- 1995 Plenary speaker at the *Annual Meeting of Finnish Mathematicians*, Vaasa, Finland, January 9–10, 1995.
- 1994 Speaker at special workshop organized in my honor at the occasion of receiving an honorary membership in the Hungarian Operational Research Society, Budapest, October 31, 1994.
- 1994 Plenary speaker, IEEE European Workshop on Computer Intensive Methods in Control and Signal Processing, Prague, September 7–9, 1994.
- 1994 Keynote speaker, IFAC Symposium on Modeling and Identification, Herzelia, Israel, June 21, 1994.
- 1993 Invited speaker at workshop on "Systems and Control Theory: Retrospect and Prospect", Cortona, Italy, April 15–20, 1993.
- 1992 Invited speaker Third Conference on Computation and Control, Bozeman, Montana, August 5–11, 1992.
- 1992 Invited speaker at Systems, Models and Feedback: Theory and Applications. Workshop in honor of Professor Antonio Ruberti, Capri, June 15–17, 1992.
- 1991 Invited speaker at Stochastic Theory and Adaptive Control Workshop (sponsored by NSF), University of Kansas, September 26–28, 1991.
- 1991 Plenary speaker at Preconf. to the MTNS, Hangzhou, China, June 13, 1991.
- 1990 Plenary speaker at Second Conference on Computation and Control, Bozeman, Montana, August 1 - 11, 1990.
- 1990 Plenary speaker at the "International Interdisciplinary Workshop on Modern Directions in Time Series Analysis" sponsored by the Institute of Mathematics and its Applications, University of Minnesota, July 1990.
- 1988 Plenary speaker at Fifth IMA International Conference on Control Theory, Glasgow, Scotland, September 14-16, 1988.
- 1986 Plenary speaker at IFAC Symposium on Stochastic Control, Vilnius, Lithuania, May 19-23, 1986.

OTHER SCIENTIFIC COMMITTEES

- 2006–2013 Member of the Applied Mathematics Committee of the European Mathematical Society
- 2008 Member of referee panel for the Research Council of Denmark.
- 2005–2006 Member of a Committee evaluating the University of Padova, Italy.
- 1993–1998 Member of the Committee for IIASA, Systems Analysis and Risk Analysis, FRN (Swedish Council for Planning and Coordination of Research).
- 1995–1998 Member of the Evaluation Committee for the Mathematical Sciences, NFR (Swedish Natural Science Foundation).
- 1993–1998 Vice-Chairman, International IFAC Committee on Stochastic Systems.
- 1985–1987 Chairman of Steering Committee of International Symposia on the Mathematical Theory of Networks and Systems (MTNS).

- 1987– Member of Steering Committee of MTNS.
- 1989–1992 International IFAC Committee for *Mathematics in Control*
Referee for for a large number of journals and for NSF, AFOSR, NATO, STINT, KVA, Italian National Research Foundation, and others.
- 2001– Examiner (Revisore), University of Padova, Italy.
- 2004–2005 Evaluator for the Italian research Foundation (CIVR) and the Israel Science Foundation (ISF).
- 2005 Member, IEEE Fellows Evaluation Committee for the Control Systems Society.
- 2004 Program Chair, Second Swedish-Chinese Control Conference, Stockholm, Sweden, October 16–17, 2004.
- 2004 Co-chairman, ERNSI Workshop on System Identification, Dobogókő, Hungary, october 11-13, 2004
- 2004 International Program Committee, International Workshop on Prediction and Decision Making under Uncertainties, Ternopil, Ukraine, May 25–30, 2004.
- 2004 Program Chair, First Swedish-Israeli Control Conference, Stockholm, Sweden, September 27–28, 2004.
- 2004 Program Co-Chair, First Swedish-Chinese Control Conference, Stockholm, Sweden, August 21-22, 2003.
- 2004 Member, Organizing Committee of Fourth European Mathematical Congress, Stockholm, June 27 – July 2, 2004.
- 2002 International Advisory Committee of the Satellite Conference of ICM 2002 on Optimization and Control, Xian, China, August 30 - September 1, 2002
- 2002 International Advisory Committee of the 34th ISCIE International Symposium on Stochastic Systems Theory and its Applications, Fukuoka, Japan, October 31 - November 1, 2002
- 2001 Member, International Advisory Committee of the 33th ISCIE International Symposium on Stochastic Systems Theory and its Applications, Tochigi, Japan, October 29 - 30, 2001.
- 2000 International Advisory Committee of the 32th ISCIE International Symposium on Stochastic Systems Theory and its Applications, Tottori, Japan, November 1–2, 2000.
- 2000 International Program Committee, International Symposium on the Mathematical Theory of Networks and Systems (MTNS2000), Perpignan, France, June 19–23, 2000.
- 1999 International Advisory Committee of the 31th ISCIE International Symposium on Stochastic Systems Theory and its Applications, Yokohama, Japan, November 11–12, 1999.
- 1998 Program Committee, 1998 International Symposium on the Mathematical Theory of Networks and Systems (MTNS98), Padova, Italy, July 6–10, 1998.
- 1998 International Advisory Committee of the 30th ISCIE International Symposium on Stochastic Systems Theory and its Applications, Kyoto, Japan, November 4–6, 1998.
- 1997 Chairman, ERNSI Workshop (European Research Network for System Identification), Stockholm, Sweden September 8–10, 1997.
- 1997 Scientific Committee, Workshop on Open Problems in Mathematical Systems Theory and Control, Liege, Belgium, June 30, 1997.
- 1996 International advisory committee of the 28th ISCIE International Symposium on Stochastic Systems Theory and its Applications, Kyoto, Japan, November 14–16, 1996.

- 1996 Program Committee for the 1996 IEEE Conference on Decision and Control, Kobe, Japan, December 11-13, 1996.
- 1995 Member, Steering Committee of the ERCIM Working Group Control and System Theory, 1995.
- 1995 Organizing committee of ERCIM Workshop on Systems and Control, Budapest, Hungary, November 6–8, 1995.
- 1995 International advisory committee for the 27th ISCIE International Symposium on Stochastic Systems Theory and Its Applications, Beppu, Oita, Japan, October 31 – November 2, 1995.
- 1994 Organizing committee of the 26th ISCIE Symposium on Stochastic Systems Theory and its Applications in Kyoto, Japan, October 26-28, 1994.
- 1994 Co-chairman, European Network for Systems Identification Workshop, Noordwijkerhout, September, 1994.
- 1993 Organizing Committee of the 25th ISCIE Symposium on Stochastic Systems Theory and its Applications, Osaka, Japan, November 10–12, 1993.
- 1993 Program Committee for MTNS-93, Regensburg, Germany, August 1993.
- 1992 Co-Chairman, Italian-Swedish Workshop in Modeling and Identification, Stockholm, Sweden, September 1992.
- 1992 Organizing Committee of the 24th ISCIE Symposium on Stochastic Systems Theory and its Applications, Kyoto, Japan, November 11–13, 1992.
- 1990 International Board of Advisors, Second SIAM Conference on Linear Algebra in Signals, Systems and Control, San Francisco, November 1990.
- 1989 Organizing Committee MTNS-89, Amsterdam, June 19–23, 1989.
- 1988 International Programme Committee of Fifth IMA International Conference on Control Theory, Glasgow, Scotland, September 14–16, 1988.
- 1987 Organizing Committee MTNS-87, Phoenix, Arizona, June 15–19, 1987.
- 1985 Chairman, International Symposium on the Mathematical Theory of Networks and Systems in Stockholm, June 10-14, 1985 (MTNS-85).

DISSERTATION STUDENTS (proforma students excluded)

- 1979 Michele Pavon, PhD, now Professor, University of Padova, Italy
- 1980 Faris Badawi, PhD, now Professor, University of Petroleum and Minerals, Daharan, Saudi Arabia
- 1986 Andrea Gombani, PhD, now Senior Researcher, Consiglio Nazionale delle Ricerche, Padova, Italy
- 1991 Anders Rantzer, PhD, SIAM Best Student Paper Award 1990, now Professor of Automatic Control, University of Lund, Sweden, Member of the Royal Swedish Academy of Engineering (IVA)
- 1992 Yishao Zhou, PhD, now University Lecturer of Mathematics, Stockholm University, Sweden
- 1992 Jan-Åke Sand, Licentiate
- 1994 Martin Hagström, Licentiate
now Head of Division, Swedish National Defence Research Institute (FOI)
- 1994 Jan-Åke Sand, PhD, now Chief Analyst at SEB
- 1995 Mattias Nordin, Licentiate (codirected with Per-Olof Gutman)

- 1998 Jöran Petersson, Licentiate (codirected with K. Holmström)
- 1998 Jore Mari, PhD, now at General Electric Global Research, München
- 1998 Anders Dahlén, Licentiate
- 2000 Magnus Egerstedt, PhD (codirected with X. Hu), postdoc at Harvard, now Professor at Georgia Tech
- 2000 Mattias Nordin, PhD (codirected with Per-Olof Gutman), now Head of Development at Volvo Construction Equipment, Member, Industrial Research Committee of Royal Swedish Academy of Engineering (IVA)
- 2001 Per Enqvist, PhD, Associate Professor at the Royal Institute of Technology, Stockholm, Sweden
- 2001 Claudio Altafini, PhD (codirected with X. Hu), now Researcher at SISSA-ISAS International School for Advanced Studies Trieste, Italy
- 2001 Anders Dahlén, PhD, now working with Research and Development at Telia Research, Stockholm
- 2001 Camilla Landén, PhD (codirected with T. Björk)
- 2002 Ryoza Nagamune, PhD, IEEE Control System Society Best Student Paper Prize 2001, Postdoc at UC Berkeley, now Professor at Univ. British Columbia
- 2005 Anders Blomqvist, PhD, Financial Analyst at Kaupthing Bank
- 2006 Gianantonio Bortolin, PhD (codirected with Per-Olof Gutman), now works with R & D at Volvo Construction Equipment
- 2006 Christelle Gaillemard, Licentiate (codirected with Per-Olof Gutman)
- 2008 Giovanna Fanizza, PhD, now at SwissQuant Group AG, Zürich, Switzerland
- 2008 Johan Karlsson, PhD, finalist for IEEE Control System Society Best Student Paper Prize in 2007 and in 2008, now Associate Professor at KTH, Stockholm.
- 2009 Yohei Kuroiwa, PhD
- 2011 Enrico Avventi, PhD
- Bin Zhu
- Axel Ringh (codirected with Johan Karlsson)
- Yufang Cui
- Tengchao Yu (codirected with Jinglai Li)

POSTDOCTORAL FELLOWS

- 1989-1990 Xiaoming Hu, Gustafsson Postdoctoral Fellow
now Professor at KTH
- 1991-1992 Alexander Megretski, Gustafsson Postdoctoral Fellow
now Associate Professor with tenure at MIT
- 1993-1994 Vincent Blondel, Gustafsson Postdoctoral Fellow
now Professor at the Catholic University of Lovain, Belgium
- 1999-2000 Alessandro Chiuso, TMR Postdoctoral Fellow
now Assistant Professor at the University of Padova
- 2000-2001 Jarmo Malinen, TMR Postdoctoral Fellow
Recipient of the Nevanlinna Dissertation Prize for the best Finnish mathematical dissertation in year 2000
- 2003-2004 Chung-Yao Kao, Gustafsson Postdoctoral Fellow

PUBLICATIONS**Books**

1. *Linear Stochastic Systems: A Geometric Approach to Modeling, Estimation and Identification* (with G. Picci), Springer Berlin Heidelberg, 2015.
2. *New Directions and Applications in Control Theory* (Editor, with W. P. Dayawansa and Y. Zhou), Springer Verlag, 2005.
3. *Computational and Combinatorial Methods in Systems Theory* (Editor, with C.I. Byrnes), North-Holland, 1986.
4. *Theory and Applications of Nonlinear Control Systems* (Editor, with C.I. Byrnes), North-Holland, 1986.
5. *Modelling, Identification and Robust Control* (Editor, with C.I. Byrnes), North-Holland, 1986.
6. *Frequency Domain and State Space Methods for Linear Systems* (Editor, with C.I. Byrnes), North-Holland, 1986.

Refereed articles

1. *Multidimensional rational covariance extension with approximate covariance matching* (with A. Ringh and J. Karlsson), SIAM J. Control and Optimization, to be published (arXiv:1704.08326v1).
2. *Kalman's influence on my scientific work: Some recollections and reflections*, IEEE Control Systems Magazine 37(2), April 2017, 156 -157, invited paper.
3. *Optimal estimation with missing observations via balanced time-symmetric stochastic models* (with T.T. Georgiou), IEEE Trans. Automatic Control 62(11) (November 2017), pp. 5590-5603.
4. *Likelihood analysis of power spectra and generalized moment problems* (with T.T. Georgiou), IEEE Trans. Automatic Control 62(9) (Sept. 2017), pp. 4580 - 4592.
5. *Partial realization theory and system identification redux*, Proc. 2017 Asian Control Conference (2017), to be published.
6. *Further results on multidimensional rational covariance extension with application to texture generation* (with A. Ringh and J. Karlsson), Proc. 2017 Conf. Decision and Control, Melbourne (2017), to be published.
7. *Modeling of stationary periodic time series by ARMA representations* (with G. Picci), In: Boris Goldengorin (Ed.). Optimization and Its Applications in Control and Data Sciences: in Honor of Boris T. Polyaks 80th Birthday. Springer Optimization and Its Applications, Vol. 115, Pages 281-314, Springer, New York, 2016.
8. *Multidimensional rational covariance extension with applications to spectral estimation and image compression* (with A. Ringh and J. Karlsson), SIAM J. Control and Optimization 54(4) (2016), 1950-1982.

9. *The multidimensional moment problem with complexity constraint* (with J. Karlsson and A. Ringh), *Integral Equations and Operator Theory* 84 (2016), 395–418.
10. *An identification approach to image deblurring* (with Bin Zhu), 2016 Chinese control conference, Chengdu, China, pp. 235–241.
11. *The multidimensional circulant rational covariance extension problem: Solutions and applications in image compression* (with J. Karlsson and A. Ringh), *Proc. 1015 IEEE Decision and Control Conference*, Osaka, Japan, pp. 5320–5327.
12. *Spectral estimation of periodic and skew periodic random signals and approximation of spectral densities* (with A. Ringh), *Proceedings of the 33rd Chinese Control Conference*, July 28–30, 2014, Nanjing, China, pp. 5322–5327.
13. *On time-reversibility of linear stochastic models* (with T.T. Georgiou), *IFAC World Congress*, 2014.
14. *Moment-based Dirac mixture approximation of circular densities* (with Uwe D. Hanebeck), *IFAC World Congress*, 2014.
15. *On the multivariate circulant rational covariance extension problem* (with C. Masiero and G. Picci), *Proc. 52nd Conf. Decision and Control (CDC 2013)*, 2013.
16. *The circulant rational covariance extension problem: the complete solution* (with G. Picci), *IEEE Trans. Automatic Control* 58 ((November 2013), 2848–2861.
17. *The separation principle in stochastic control, redux* (with T.T. Georgiou), *IEEE Trans. Automatic Control* 58 (October 2013), 2481–2494.
18. *ARMA identification of graphical models* (with E. Avventi and B. Wahlberg), *IEEE Trans. Automatic Control* 58 (May 2013), 1167–1178.
19. *Revisiting the separation principle in stochastic control* (with T.T. Georgiou), *Proc. 51st Conf. Decision and Control (CDC 2012)*, 2012.
20. *Graphical models of autoregressive moving-average processes* (with E. Avventi and B. Wahlberg), *Proc. 2010 MTNS*.
21. *The inverse problem of analytic interpolation with degree constraint and weight selection for control synthesis* (with J. Karlsson and T. T. Georgiou), *IEEE Trans. Automatic Control*, **AC-55** (2010), 405–418.
22. *On the stability and instability of Padé approximants* (with C. I. Byrnes), in *Perspectives in Mathematical System Theory, Control, and Signal Processing*, J.C. Willems, S. Hara, Y. Ohta and H. Fujioka (Eds.), Springer Verlag Lecture Notes Series in Control and Information Sciences, 2010, pp. 165–175.
23. *The moment problem for rational measures: convexity in the spirit of Krein* (with C. I. Byrnes), in *Modern Analysis and Application: Mark Krein Centenary Conference, Vol. I: Operator Theory and Related Topics*, Book Series: Operator Theory Advances and Applications Volume 190, Birkhuser, 2009, pp. 157 – 169.
24. *A global injective function theorem* (with C. I. Byrnes), submitted for publication.

25. *On degree-constrained analytic interpolation with interpolation points close to the boundary* (with J. Karlsson), IEEE Trans. Automatic Control **54**(6) (2009), 1412–1418.
26. *Important Moments in Systems, Control and Optimization* (with C.I.Byrnes), Proc. 48th IEEE Conf. Decision and Control, 2009.
27. *Important moments in systems and control* (with C. I. Byrnes), SIAM J. Control and Optimization **47**(5) (2008), 2458–2469.
28. *Weight selection for gap robustness with degree-constrained controllers* (with J. Karlsson and T.T. Georgiou), Proc. 47th IEEE Conf. Decision and Control, 2008, pp. 4127–4134.
29. *Stability-preserving rational approximation subject to interpolation constraints* (with J. Karlsson), IEEE Trans. Automatic Control **53**(7) (2008), 1724–1730.
30. *A convex optimization approach to ARMA modeling* (with T. T. Georgiou), IEEE Trans. Automatic Control **53** (2008), 1108–1119.
31. *A note on the Jacobian conjecture* (with C. I. Byrnes), Proceedings of the American Mathematical Society **136** (2008), 3007–3011.
32. *Prediction-error approximation by convex optimization, in Modeling, Estimation and Control: Festschrift in honor of Giorgio Picci on the occasion of his sixty-fifth Birthday*, A. Chiuso, A. Ferrante and S. Pinzoni (eds), Springer-Verlag, 2007, 265–275.
33. *Passivity-preserving model reduction by analytic interpolation* (with G. Fanizza, J. Karlsson and R. Nagamune), Linear Algebra and its Applications **425** (2007), 608–633.
34. *Stable rational approximation in the context of interpolation and convex optimization* (with J. Karlsson), Proc. 46th IEEE Conf. Decision and Control, 2007, pp. 4353–4360.
35. *Interior point solutions of variational problems and global inverse function theorems* (with C. I. Byrnes), International Journal of Robust and Nonlinear Control **17** (2007), 463–481: special issue in honor of V.A.Yakubovich on the occasion of his 80th birthday.
36. *Remarks on control design with degree constraint* (with T. T. Georgiou), IEEE Transactions on Automatic Control AC-51 (July 2006), 1150–1156.
37. *The generalized moment problem with complexity constraint* (with C. I. Byrnes), Integral Equations and Operator Theory **56**(2) (2006), 163–180 (published online March 29, 2006).
38. *Generalized interpolation in H -infinity with a complexity constraint* (with C. I. Byrnes, T. T. Georgiou and A. Megretski), Transactions of the American Mathematical Society **358** (2006), no. 3, pp. 965–987 (electronically published on December 9, 2004).
39. *The inverse problem of analytic interpolation with degree constraint* (with J. Karlsson and T.T. Georgiou), Proc. 45th IEEE Conf. Decision and Control, 2006, pp. 559–564.

40. *A global analysis approach to passivity preserving model reduction* (with G. Fanizza, J. Karlsson and R. Nagamune), Proc. 45th IEEE Conf. Decision and Control, 2006, pp. 3399–3404.
41. *Bi-tangential Nevanlinna-Pick interpolation with a complexity constraint* (with Y. Kuroiowa), Proceedings of the 17th International Symposium on the Mathematical Theory of Networks and Systems, Kyoto, 2006, pp. 2541–2563.
42. *On degree-constrained analytic interpolation with interpolation points close to the boundary* (with J. Karlsson), Proceedings of the 17th International Symposium on the Mathematical Theory of Networks and Systems, Kyoto, 2006, pp. 2564–2569.
43. *A homotopy continuation solution of the covariance extension equation* (with C. I. Byrnes and G. Fanizza), in *New Directions and Applications in Control Theory*, Springer Verlag, 2005, pp. 27–42.
44. *Two alternative views on control design with degree constraint* (with T.T. Georgiou), Proceedings of the 44th IEEE Conference on Decision and Control, 2005, pp. 3645–3650.
45. *The covariance extension equations revisited* (with C.I. Byrnes and G. Fanizza), Proceedings of the 44th IEEE Conference on Decision and Control, 2005, pp. 7924–7930.
46. *Kullback-Leibler approximation of spectral density functions* (with T. T. Georgiou), IEEE Transactions on Information Theory 49 (Nov. 2003), 2910–2917.
47. *Matrix-valued Nevanlinna-Pick interpolation with complexity constraint: An optimization approach* (with A. Blomqvist and R. Nagamune), IEEE Transactions on Automatic Control 48 (Dec. 2003), 2172–2190.
48. *The uncertain generalized moment problem with complexity constraint* (with C. I. Byrnes), in *New Trends in Nonlinear Dynamics and Control*, W. Kang, M. Xiao and C. Borges (Eds.), Springer Verlag, 2003, 267–278.
49. *A convex optimization approach to generalized moment problems* (with C. I. Byrnes), in *Control and Modeling of Complex Systems: Cybernetics in the 21st Century: Festschrift in Honor of Hidenori Kimura on the Occasion of his 60th Birthday*, Koichi Hashimoto, Yasuaki Oishi, and Yutaka Yamamoto, Editors, Birkhauser, 2003,
50. *Kullback-Leibler approximation of spectral density functions* (with T.T. Georgiou), Proceedings. 42nd IEEE Conference on Decision and Control, 2003, Volume: 4, pp 4237 - 4242.
51. *Identifiability and well-posedness of shaping-filter parameterizations: A global analysis approach* (with C. I. Byrnes and P. Enqvist), SIAM J. Control and Optimization 41 (2002), 23–59.
52. *Identifiability of shaping filters from covariance lags, cepstral windows and Markov parameters* (with C.I. Byrnes and P. Enqvist), Proceedings of the 41st IEEE Conference on Decision and Control, 2002, pp. 246 - 251 vol.1.

53. *Interior point solutions of variational problems and global inverse function theorems* (with C. I. Byrnes), submitted for publication (available as Report TRITA/MAT-01-OS13, 2001).
54. *From finite covariance windows to modeling filters: A convex optimization approach* (with C. I. Byrnes and S.V. Gusev), SIAM Review **43** (Dec. 2001), 645–675, especially invited “SIGEST paper”.
55. *A generalized entropy criterion for Nevanlinna-Pick interpolation: A convex optimization approach to certain problems in systems and control* (with C. I. Byrnes and T. T. Georgiou), IEEE Trans. **AC-46** (2001), 822–839.
56. *Sensitivity shaping in feedback control and analytic interpolation theory* (with R. Nagmune), Optimal Control and Partial Differential Equations, J.L. Medaldi et al (editors), IOS Press, Amsterdam, 2001, 404–413.
57. *Cepstral coefficients, covariance lags and pole-zero models for finite data strings* (with C. I. Byrnes and P. Enqvist), IEEE Trans. **SP-50** (April 2001), 677–693.
58. *On the duality between filtering and Nevanlinna-Pick interpolation* (with C. I. Byrnes), SIAM J. Control and Optimization **39** (2000), 757–775.
59. *A new approach to spectral estimation: A tunable high-resolution spectral estimator* (with C. I. Byrnes and T. T. Georgiou), IEEE Trans. **SP-49** (2000), 3189–3205.
60. *A covariance extension approach to identification of time series* (with J. Mari and A. Dahlén), Automatica **36** (2000), 379–398.
61. *Advances in high-resolution spectral estimation* (with C. I. Byrnes and T. T. Georgiou), System Theory: Modeling, Analysis and Control, T.E. Djaferis and I.C. Schick (editors), Kluwer Academic Publishers, 2000, 167–179.
62. *Universal regulators for optimal tracking in discrete-time systems affected by harmonic disturbances* (with V. A. Yakubovich), IEEE Trans. **AC-44** (1999), 1688–1704.
63. *A convex optimization approach to the rational covariance extension problem* (with C. I. Byrnes and S. V. Gusev), SIAM J. Control and Optimization **37** (1999), 211–229.
64. *Analytic interpolation with degree constraint: A constructive theory with applications to control and signal processing* (with C. I. Byrnes and T. T. Georgiou), Proceedings of the 38th IEEE Conference on Decision and Control 1999, 982–988.
65. *A convex optimization approach to the covariance extension problem with degree constraint* (with C. I. Byrnes and S. V. Gusev), Proceedings of the 38th IEEE Conference on Decision and Control 1999, 1451–1457.
66. *Universal regulators for optimal tracking in linear discrete systems* (with V. A. Yakubovich), Dokl. Akad. Nauk **361: 2** (1998) (in Russian).
67. *Experimental evidence showing that stochastic subspace identification methods may fail* (with A. Dahlén and J. Mari), Systems and Control Letters **34** (1998), 303–312.
68. *Stochastic model reduction* (with Gy. Michaletzky), Proc. MTNS 98, Padova, Italy, 831–834.

69. *Universal Controllers for Optimal Damping of Forced Oscillations in Linear Discrete Systems* (with V. A. Yakubovich), Doklady Mathematics **88:1** (1997), 156–159 (in Russian).
70. *On the partial stochastic realization problem* (with C. I. Byrnes), IEEE Trans. **AC-42** (1997), 1049–1069.
71. *Optimal damping of forced oscillations in discrete-time systems* (with V. A. Yakubovich), IEEE Trans. **AC-42** (1997), 786–802.
72. *Output-induced subspaces, invariant directions and interpolation in linear discrete-time stochastic systems* (with Gy. Michaletzky), SIAM J. Control and Optimization **35** (1997), 810–859.
73. *On a duality between filtering and interpolation* (with C. I. Byrnes), Systems and Control in the Twenty-First Century, C.I. Byrnes, B.N. Datta, C.F. Martin and D.S. Gilliam (editors), Birkhäuser Boston, 1997, pp. 101–136.
74. *Recent progress in the partial stochastic realization problem*, Operators, Systems, and Linear Algebra, U. Helmke, D. Prätzel-Wolters and E. Zerz (editors), B. G. Teuber Stugart, 1997, 129–137.
75. *On the well-posedness of the rational covariance extension problem* (with C. I. Byrnes and H. J. Landau), in Current and Future Directions in Applied Mathematics, M. Alber, B. Hu and J Rosenthal (editors), Birkhuser Boston, 1997, 81 –108.
76. *Optimal damping of forced oscillations by output feedback* (with V. A. Yakubovich), Stochastic Differential and Difference Equations, I. Csiszár and Gy. Michaletzky, editors, Progress in Systems and Control Theory, Vol. 23, Birkhäuser, 1997, pp. 203–231.
77. *Output-induced subspaces, invariant directions and interpolation in linear discrete-time stochastic systems* (with Gy. Michaletzky), Proc. 36th IEEE Conf. Decision and Control, San Diego, CA, December 1997, pp. 2815-2820.
78. *Canonical correlation analysis, approximate covariance extension, and identification of stationary time series* (with G. Picci), Automatica **32** (1996), 709–733.
79. *Geometric methods for state space identification* (with G. Picci), Identification, Adaptation, Learning: The Science of Learning Models from Data, S. Bittanti and G. Picci (editors), Nato ASI Series (Series F, Vol 153), Springer, 1996, 1–69.
80. *A complete parameterization of all positive rational extensions of a covariance sequence* (with C. I. Byrnes, S. V. Gusev and A. S. Matveev), IEEE Trans. **AC-40** (1995), 1841–1857.
81. *Zeros of spectral factors, the geometry of splitting subspaces and the algebraic Riccati inequality* (with G. Michaletzky and G. Picci), SIAM J. Control and Optimization **33** (1995), 365–401.
82. *Survey on the state of systems and control* (with V. Blondel and M. Gevers), European Journal of Control **1** (1995), 5–23.

83. *Toward a solution of the minimal partial stochastic realization problem* (with C. I. Byrnes), *Comptes Rendus Acad. Sci. Paris*, t. 319, Series I (1994), 1231–1236.
84. *On the nonlinear dynamics of Kalman filtering* (with C. I. Byrnes and Y. Zhou), *SIAM J. Control and Optimization* **32** (1994), 744–789.
85. *Some recent advances on the rational covariance extension problem* (with C. I. Byrnes), *Proc. IEEE European Workshop on Computer Intensive Methods in Control and Signal Processing*, Prague 1994, 149–158.
86. *The geometry of positive real functions with applications to the rational covariance extension problem* (with C. I. Byrnes, S. V. Gusev and A. S. Matveev), *Proc. 33rd Conf. on Decision and Control*, 3883–3888.
87. *On “subspace methods” identification* (with G. Picci), in *Systems and Networks: Mathematical Theory and Applications II*, U. Hemke, R. Mennicken and J Saurer, eds., Akademie Verlag, 1994, pp. 315–320.
88. *On “subspace methods” identification and stochastic model reduction* (with G. Picci), *Proc IFAC Workshop on Systems Identification*, Copenhagen, 1994, 397–403.
89. *On the connections between splitting subspaces and geometric control theory* (with G. Michaletzky and G. Picci), *Proc. Second European Control Conf.* (1993), 1125-1131.
90. *On dynamical behavior of the Kalman filter* (with C. I. Byrnes and Y. Zhou), *Proc. of the 31st IEEE Conf. on Decision and Control*, Dec. 1992, pp. 3678–3679.
91. *A geometric approach to modelling and estimation of linear stochastic systems* (with G. Picci), *J. Mathematical Systems, Estimation, and Control* **1** (1991), 241-333.
92. *Predicability and unpredictability in Kalman filtering* (with C. I. Byrnes and T. McGregor), *IEEE Trans. Automatic Control* **AC-36** (1991), 563-579.
93. *Stable, unstable and center manifolds for fast filtering algorithms* (with C. I. Byrnes and Y. Zhou), *Modeling, Estimation and Control of Systems with Uncertainty* (G. B. DiMasi, A. Gombani, and A. B. Kurzhanski, eds.), Birkhäuser Boston, 1991, 58-75.
94. *On the geometry of the Kimura - Georgiou parameterization of modelling filters* (with C.I. Byrnes), *Intern. J. Control* **50** (1989), 2301-2312.
95. *Stochastic realization and the local structure of the Riccati inequality* (with G. Picci), in *The Riccati Equation in Control, Systems, and Signals*, S. Bittanti, ed. Pitagora Editrice Bologna, 1989, 69-72.
96. *On noncausal estimation, stochastic realization and the Riccati inequality* (with G. Picci), *Proc. 1989 IEEE CDC*.
97. *An algebraic description of the rational solutions of the covariance extension problem* (with C.I. Byrnes), in *Linear Circuits, Systems and Signal Processing*, C.I. Byrnes, C.F. Martin and R.E. Saeks (editors), Elsevier 1988, 9-17.
98. *A stochastic realization approach to the discrete-time Mayne-Fraser smoothing formula* (with F.A. Badawi), in *Frequency Domain and State Space Methods for Linear Systems* (C.I. Byrnes and A. Lindquist, eds), North-Holland, (1986), 251-262.

99. *Forward and backward semimartingale models for Gaussian processes with stationary increments* (with G. Picci), *Stochastics* **15** (1985), 1-50.
100. *Realization theory for multivariate stationary Gaussian processes* (with G. Picci), *SIAM J. Control and Optimization* **23** (1985), 809-857.
101. *Infinite dimensional stochastic realization of continuous-time stationary vector processes* (with G. Picci), *Topic in Operators and Systems*, H. Dym and I. Gohberg, eds., Birkhäuser Verlag, (1984), 335-350.
102. *Extreme points of Riccati inequalities* (with C. Martin and G. Picci), *IEEE Trans. Automatic Control* **AC-29** (1984), 1034.
103. *On the structure of state space models for discrete-time stochastic vector processes* (with M. Pavon), *IEEE Trans. Automatic Control*, **AC-29** (1984), 418-432.
104. *Recent trends in stochastic realization theory* (with M. Pavon and G. Picci), *Prediction Theory and Harmonic Analysis, The Pesi Masani Volume*, V. Mandrekar and H. Salehi (eds.), North Holland Publ. Co. (1983), 201-224.
105. *On the partial realization problem* (with W.B. Gragg), *Linear Algebra and Appl.* **50** (1983), 277-319.
106. *Toward a theory of nonlinear stochastic realization* (with S. Mitter and G. Picci), *Feedback and Synthesis of Linear and Nonlinear Systems*, D. Hinrichsen and A. Isidori (eds.), *Lecture Notes in Control and Information Sciences*, Vol. 39, 175-189.
107. *Stability and instability of partial realizations* (with C.I. Byrnes), *Systems and Control Letters* **2** (1982), 99-105.
108. *On a condition of minimality of Markovian splitting subspaces* (with G. Picci), *Systems and Control Letters* **1** (1982), 264-269.
109. *A Hamiltonian approach to the factorization of the matrix Riccati equation* (with F. Badawi), *Mathematical Programming Study* **18** (1982), 27-38.
110. *State space models for stochastic processes* (with G. Picci), *Stochastic Systems: The Mathematics of Filtering and Identification and Applications*, M. Hazewinkel and Jan Willems, eds. Reidel Publ. Co., (1981), 169-204.
111. *Markovian representation of discrete-time stationary stochastic vector processes* (with M. Pavon). *Proc. (1981) Decision and Control Conf., San Diego, Calif.*
112. *Comments on "A simple proof of the separation theorem for linear systems with time delays*, *IEEE Trans. Autom. Control*, **AC-25** (April 1980), 274-275.
113. *Realization theory for multivariate Gaussian processes II: State space theory revisited and dynamical representations of finite dimensional state spaces* (with G. Picci), *Advances in Control*, edited by D.G. Lainidis and N.S. Tzannes, Reidel (1980), 108-129.
114. *Realization theory for multivariate stationary Gaussian processes I: State space construction* (with G. Picci), *Proc. 4th Intern. Symp. Math. Theory of Networks and Systems*, (July 1979), Delft, Holland.

115. *A stochastic realization approach to the smoothing problem* (with F. Badawi and M. Pavon), IEEE Trans. Autom. Control **AC-24** (December 1979), 878-888.
116. *On the Mayne-Fraser smoothing formula and stochastic realization theory for nonstationary linear stochastic systems* (with F. Badawi and M. Pavon), Proc. 1979 Conf. on Decision and Control, Fort Lauderdale, (Dec. 1979).
117. *On minimal splitting subspaces and Markovian representations* (with G. Picci and G. Ruckebusch), Mathematical Systems Theory **12** (May 1979), 271-279.
118. *A Hardy space approach to the stochastic realization problem* (with G. Picci), Proc. (1978) Conf. Decision and Control, San Diego 933-939.
119. *A state-space theory for stationary stochastic processes* (with G. Picci), Proc. 21st Midwest Sym. Circuits and Systems, Ames, Iowa (August 1978), 108-113.
120. *On the stochastic realization problem* (with G. Picci), SIAM J. Control and Optimization **17** (1979), 365-389.
121. *On the structure of minimal splitting subspaces in stochastic realization theory* (with G. Picci), Proc. (1977) Conf. Decision and Control, New Orleans, 42-48.
122. *A note on the stochastic realization problem* (with G. Picci), Proc. Intern. Conf. Information Sciences and Systems, Patras, Greece, (1976).
123. *Some reduced-order non-Riccati equations for linear least-squares estimation: The stationary single-output case*, Intern. J. Control **24** (1976), 821-842.
124. *Some new non-Riccati algorithms for continuous-time Kalman-Bucy filtering*, Applied Mathematics and Optimization **3** (1976), 1-13.
125. *On integrals in multi-output discrete-time Kalman-Bucy filtering*, Mathematical Programming Studies **5** (1976), 145-168.
126. *Linear least-squares prediction based on covariance data from stationary processes with finite-dimensional realizations*, Proc. Second European Congress on Operations Research, Stockholm, Sweden, North Holland Publ. Co., (1976).
127. *Linear least squares estimation of discrete-time stationary processes by means of backward innovations*, Control Theory, Numerical Methods and Computer Systems Modelling, edited by A. Bensoussan and J.L. Lions, Lecture Notes in Economics and Mathematical Systems, Vol. 107, 44-63, Springer-Verlag, (1975).
128. *On Fredholm integral equations, Toeplitz equations, and Kalman-Bucy filtering*, Applied Mathematics and Optimization **1** (1975), 355-373.
129. *Optimal filtering of continuous-time stationary processes by means of the backward innovation process*, SIAM J. Control **12** (November 1974), 747-754.
130. *A new algorithm for optimal filtering of discrete-time stationary processes*, SIAM J. Control **12** (November 1974) 736-746.
131. *On feedback control of linear stochastic systems*, SIAM J. Control **11** (May 1973), 323-343.

132. *Optimal control of linear stochastic systems with applications to time lag systems*, Information Sciences **5** (January 1973), 81-126.
133. *A theorem on duality between estimation and control for linear stochastic systems with time delay*, Journal of Mathematical Analysis and Applications **37** (February 1972), 516-536.
134. *A note on feedback control of linear stochastic systems*, Proceedings of the European Meeting on Cybernetics and Systems Research, Vienna, (May 1972), 69-72.
135. *Comments on certainty equivalence in stochastic linear time-lag systems*, Proceedings of the IEEE **59** (December 1971), 1722-1724.
136. *Optimal estimation and control of hereditary linear stochastic systems*, K-TRYCK, Stockholm 1971.
137. *Optimeringslära*, Bygghandboken 1A, Byggmästarens förlag, 1971, 183-200, (In Swedish; tutorial).
138. *An innovations approach to optimal control of linear stochastic systems with time delay*, Information Sciences **1** (July 1969), 279-295.
139. *On optimal stochastic control with smoothed information*, Information Sciences **1** (December 1968), 55-85.

Book Reviews

1. "Linear Estimation and Stochastic Control" by M.H.A. Davis (Wiley 1977) *SIAM Reviews* 22 (1980), 239-241.
2. "Lectures in Linear Least-Squares Estimation" by T. Kailath (Springer Verlag 1976), *IEEE Trans. Automatic Control* AC-25 (1980).
3. "Linear Stochastic Systems" by P. Caines (John Wiley and Sons, 1988), *SIAM Review* 32 (1990), 325-328.
